| Onboard Adapter | TPM 1.2 - Gigabit LAN, 802.11b/g WLAN |
| LCD | 8.9" WXGA Touchscreen Sunlight Readable |
| USB Ports | 2 |
| Slots | 1x Mini-PCI and 1xPCMCIA Slots |
| OS | Windows XP |
| Software Option | OmniPeek Enterprise or OmniPeek Professional |

With the Omnpliance UltraPortable, WildPackets technology can be delivered directly to difficult to access segments that are in need of immediate troubleshooting. Omnpliance UltraPortable is the ideal, mobile solution for advanced troubleshooting of Ethernet 10/100/1000, Wireless 802.11a/b/g/n, and half-duplex Gigabit network traffic.

With its rugged construction and expandability, the Omnpliance UltraPortable delivers real-time visibility into the entire network. Using OmniPeek's intuitive user interface and "top-down" approach to visualizing network conditions, network engineers can quickly analyze faults from multiple network segments; drill down through multiple layers of analysis, and pinpoint problems that need correction. To provide visibility into converged networks and analyze critical applications performance, OmniPeek offers advanced analysis of VoIP and Video over IP, application, and web traffic.
